Purpose of the course unit: programme competences to be developed

The course aims at providing the profound knowledge on the regulation of legal relations of intellectual property (IP) (copyright, trademarks, other objects of creative expressions (traditional knowledge, folklore, domain names, etc.) on the basis of international treaties and EU directives and regulation in the IP sphere; developing the abilities to critically analyse the main principles of intellectual property protection and protection of the rights, as well the jurisprudence of the European Court of Justice (ECJ) in the sphere of intellectual property law; forming the abilities to properly apply and interpret legal norms regulating IP in practice; and developing interpersonal and communication skills.

Learning outcomes of the course unit	Teaching and learning methods	Assessment methods
- Students will be able to define sources of international and EU intellectual property law as well as to explain the main principles of protection of intellectual property.	Lectures, seminars, individual work	Exam in written (problematic issues); individual (group) research work
- Students will be able to critically analyse the principles of protection of copyright, trademarks, and other results of creative expressions, enshrined in international agreements and EU legal acts and will be able to apply them in practice in accordance with the knowledge of interrelated fields.	Lectures, seminars, individual work	Exam in written (problematic issues); individual (group) research work
- Students will be able to apply methods of dispute resolution and enforcement of judgments under international, EU Law and national legal rules while providing IP-related legal services (inter alia, legal advice and recommendations, representation of legal interest).	Lectures, seminars, individual work	Exam in written (problematic issues); individual (group) research work
- Students will be able to systematically analyse and assess the ECJ case-law in an ethical manner in support of their legal decisions.	Lectures, seminars, individual work	Exam in written (problematic issues); individual (group) research work
- Students will be able to convey ideas and thoughts in an argumentative, critical and logical manner in both, verbal and written form, basing on their theoretical knowledge in intellectual property law (inter alia, draft legal documents), as well as practical skills acquired through the case-law analysis.	Lectures, seminars, individual work	Exam in written (problematic issues); individual (group) research work
- Students will be able to enhance acquired knowledge and abilities independently, inter alia, to use legal information data bases and other sources, to select relevant theoretical and practical material, and to substantiate their own conclusions by the achievements of jurisprudence.	Lectures, seminars, individual work	Exam in written (problematic issues); individual (group) research work
