Pre-requisites: none	Co-requisites (if any): none

Number of credits allocated	Total student's workload	Contact hours	Self-study hours
5	133	32	101

Purpose of the course unit (module): programme competences to be developed		
The purpose of the study unit is to give students the opportunity to form an idea of the place and role of medical law in the legal system of Ukraine, the civil law regulation of medical relations, the basic requirements for certain medical activities (subjects, objects and content), as well as legal regulation of defects in medical activities.		
Learning outcomes of the course unit (module)	Teaching and learning methods	Assessment methods
Students will understand the essence and will be able to discuss the main problems of medical law in Ukraine, correctly define the concepts present in medical relationships and identify and analyze the main trends in the development of medical law and health care.	A problematic method of teaching during lectures and seminars (the analysis of problematic practical issues, discussions), individual studies (critical literature reading)	Examination in written
Students will be able to critically analyze and ethically evaluate the rules of Ukrainian law on the legal status of subjects of medical relations, as well as distinguish between types of medical intervention and the conditions of its legality.	A problematic method of teaching during lectures and seminars (case analysis, working in group, discussions), individual studies (critical literature reading)	Examination in written
Students will be able to independently analyze, interpret and provide solutions to complex legal issues related to the protection and regulation of medical relationships, provide suggestions to reduce future conflicts, as well as advise and provide advice on these issues to interested parties or institutions.	A problematic method of teaching during lectures and seminars (the analysis of problematic practical issues, case analysis), individual studies (critical literature reading).	Examination in written
Students will be able to systemically analyze scientific and practical international, EU and Ukrainian material related to medical activities, to generalize and present it unambiguously.	A problematic method of teaching during lectures and seminars (the analysis of problematic practical issues, case analysis), individual studies (critical literature reading).	Examination in written
