

COURSE UNIT (MODULE) DESCRIPTION

Course unit (module) title	Course unit code
DATA PROTECTION AND PRIVACY LAW	

Lecturer(s)	Department(s)
Coordinator: lect. dr. Paulius Jurčys Other(s): jr. assist. Goda Strikaitė-Latušinskaja	Department of Public Law, Faculty of Law, Vilnius University; Room 411, Building 1, Saulėtekio al. 9, LT-10222, Vilnius, tel. (85)2366175, e-mail: vtkatedra@tf.vu.lt

Study cycle	Type of the course unit (module)
Second	Compulsory (Track – Tech Law)

Mode of delivery	Course unit delivery period	Language (s) of instruction
Blended	2 (spring) semester	English

Requirements for students	
Pre-requisites: none	Co-requisites (if any): none

Number of credits allocated	Total student's workload	Contact hours	Self-study hours
5	133	32	101

Purpose of the course unit (module): programme competences to be developed
--

The aim of the course is to provide students with comprehensive knowledge on data privacy and data protection law in general, and the emerging shift towards a user-centric data model; to develop abilities to interpret current data privacy regulations (the main focus will be on the General Data Protection Regulation (GDPR) and California Consumer Privacy Act (CCPA)) and to assess how they affect the daily activities of online service providers and how individuals' data privacy rights are exercised; to develop competencies to critically analyze practical problems related to data privacy law and to form legal opinions about the trends in the data ecosystem based on the court jurisprudence both in the EU and the US.

Learning outcomes of the course unit (module)	Teaching and learning methods	Assessment methods
Students will gain systematic and practical understanding of the legal protection of personal data, the opportunities provided by emerging digital technologies in terms of managing personal data as well as to provide solutions for complex legal problems related to these new user-centric technologies;	Lectures and practical sessions (group discussions, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves problem-based, research-based (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Written examination (essay type questions), cumulative assessment during practical sessions, assignment on practical counselling
Students will be able to search and manage a variety of sources related to the legal protection of personal data, including variety of soft law materials related to specific digital technologies, to critically analyse and ethically evaluate them;	Lectures and practical sessions (group discussion, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves issue spotting, analytic (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Written examination (essay type questions), cumulative assessment during practical sessions, assignment on practical counselling
Students will be able to systematically analyse the similarities and differences of international (more specifically, the US and California), European and national legal regulations with regard to the exploitation and enforcement of data and privacy protection law and assess the compliance of national legislation	Lectures and practical sessions (group discussion, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves issue spotting, analytic (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Written examination (essay type questions), cumulative assessment during practical sessions

with the EU and international legal acts;		
Students will be able to identify and assess adequacy of data and privacy protection legislation in force with regard to development of new technologies, to provide proposals on the necessary changes of legislation as well as on adoption of new legislation that is geared to give more control over personal data to individuals, and to equip with foresight on how to improve business and socio-economic environment of user-centric data;	Lectures and practical sessions (group discussion, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves issue spotting, analytic (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Cumulative assessment during practical sessions
Students will be able to reasonably apply the regulations in data privacy space in so far as they relate to specific issues of digital technologies, such as internet of things, big data, AI, differential privacy, edge computing or blockchain;	Lectures and practical sessions (group discussion, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves issue spotting, analytic (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Written examination (essay type questions), cumulative assessment during practical sessions, assignment on practical counselling
Students will be able to clearly communicate using specific terminology emerging among data privacy experts as well as digital technologies and frame their opinions within respective legal and technical terms;	Practical sessions (group discussions, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves problem-based, research-based (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Written examination (essay type questions), cumulative assessment during practical sessions, assignment on practical counselling
Students will be able to accomplish practical work tasks related to legal protection of personal data by analysing and drawing conclusions on specific case-law examples;	Lectures and practical sessions (group discussions, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves problem-based, research-based (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Cumulative assessment during practical sessions, assignment on practical counselling
Students will be able to critically evaluate their own accomplishments and to enhance acquired knowledge and skills independently, <i>inter alia</i> , by selecting relevant theoretical and practical material, and substantiating their own conclusions on the achievements of jurisprudence.	Lectures and practical sessions (group discussions, critical analysis, application sources of the legal protection of personal data, case law, doctrine analysis) requiring prior individual analysis of literary and legal sources (referred in advance). The method of delivery involves problem-based, research-based (<i>inter alia</i> , search and analysis of information) systematic, teleological, critical, and practical learning.	Written examination (essay type questions), cumulative assessment during practical sessions, assignment on practical counselling

Content: breakdown of the topics	Contact hours							Self-study: hours and assignments	
	Lectures	Consultations	Seminars	Practical sessions	Laboratory work	Internship/work placement	Contact hours	Self-study hours	Assignments
1. Regulating data privacy: historical and legal foundations in the EU and the US. Technological developments that shaped the evolution of the data protection law.	2			0			2	10	Reading materials, court cases.

2. User-centric, user-held data model: technological foundations and key principles. The system of sources of data protection law, importance of soft-law in the area, the overview of the data protection law sources applicable to the digital world.	2			1			3	10	Reading materials, court cases.
3. Data privacy theories and data ownership (personality theory, labor theory, welfare theory, social theory). Scope of applicability of the data protection laws (GDPR and CCPA): territorial, material, personal aspects, exceptions. Technological neutrality and digital data as an object of the regulation.	2			1			3	10	Reading materials, court cases.
4. New data rights and corresponding obligations of data controllers; balancing interests of different stakeholders. The significance of user-centric design.	4			2			6	12	Reading materials, court cases.
5. Notifications and consent. Specific requirements for the processing of employee data, direct marketing, video surveillance.	4			2			6	12	Reading materials, court cases.
6. User-centric data and surveillance in Post-COVID world. Challenges and opportunities with the new technologies posed to the legal protection of personal data, including but not limited to artificial intelligence, location tracking, ads, internet of things, the utility of blockchain.	4			2			6	12	Reading materials, court cases.
7. Legal remedies available to individual consumers; collective redress (class actions); DPA actions against data giants (Google, Facebook); remedies in cases of major data leaks (e.g., Equifax)	2			1			3	12	Reading materials, court cases.
8. The future trends of data privacy: international cooperation and potential of new technologies	2			1			3	23	Reading materials, court cases. Preparation for legal counseling (review of data protection compliance procedures and documents, drafting data protection advice)
Total:	22			10			32	101	

Assessment strategy	Weight %	Assessment period	Assessment criteria
Examination	60	At the end of the course	Maximum 6 points. The exam questions will reflect topics discussed in the lectures and practical sessions and will consist of three essay type questions that will have the same weight for the exam grade (maximum 2 points each, threshold 0.25). The assessment will be based on the student's capability to write in a clear, structured, logical manner, to spot issues, clearly explain arguments on relevant legal rules and relevant court practice, to analyze possibly different opinions of the academic debate, to provide personal insights and to base them on reasonable and convincing argumentation.
Cumulative assessment for work during practical sessions	30	During semester	Maximum 3 points. Up to 3 points for providing correct answers to questions, participating actively and efficiently in discussions, formulating problems and suggesting possible solutions, offering thoughtful critical remarks, contributing to other participants' ideas, etc. (threshold 0.1).

Assignment on practical counselling	10	During semester	Maximum 1 point. The assessment will be based on the student's capability to review actual data protection compliance procedures and documents of the company and to draft data protection advice. Assessment consists of: - content (addressing the client's interests and concerns, clear and accurate subjecting of relevant legal and factual issues, comprehensive problem analysis, commercially effective solutions, proper and critical source application); - structure and style (relevant formal requirements, clear structural parts, internal consistency).
